## VI. PART III. FINANCIAL DOCUMENTS

**The quantitative part of your plan.** This section of the business plan is the quantitative interpretation of everything you stated in the organizational and marketing plans. Do not do this part of your plan until you have finished the first two sections.

Financial documents are the records used to show past, current, and projected finances. The following are the major documents you will want to include in your Business Plan. The work is much easier if they are done in the order presented because they build on each other, utilizing information from the ones previously developed.

### A. SUMMARY OF FINANCIAL NEEDS (needed only if you are seeking financing)

This is an outline giving the following information:

1. **Why** you are applying for financing.
2. **How Much** capital you need.

### B. LOAN FUND DISPERSAL STATEMENT (needed only if you are seeking financing)

You should

1. **Tell How** you intend to disperse the loan funds.
2. **Back up** your statement with supporting data.

### C. PRO FORMA CASH FLOW STATEMENT (BUDGET)

This document projects what your Business Plan means in terms of dollars. It shows cash inflow and outflow over a period of time and is used for internal planning. It is a prime interest to the lender and shows how you intend to repay your loan. Cash flow statements show both **how much** and **when** cash must flow in and out of your business.

### D. THREE-YEAR INCOME PROJECTION

A Pro Forma Income P&L (Income) Statement showing projections for your company for the next three years. Use the revenues and expense totals from the Pro Forma Cash Flow Statement for the 1<sup>st</sup> year's figures and project for the next two years according to expected economic and industry trends.

### E. PROJECTED BALANCE SHEET

Projection of Assets, Liabilities, and Net Worth of your company at the end of the next fiscal year.

### F. BREAK-EVEN ANALYSIS

The break-even point is the point at which a company's expenses exactly match the sales or services volume. It can be expressed in: (1) Total dollars or revenues exactly offset by total expenses –or– (2) Total units of production (cost of which exactly equals the income derived by their sales). This analysis can be done either

mathematically or graphically. Revenue and expenses figures are drawn from the three-year income projection.

**NOTE: THE FOLLOWING (G-J) ARE ACTUAL PERFORMANCE (HISTORICAL) STATEMENTS.** They reflect the activity of your business in the past.

- If your business is new and has not yet begun operations: the financial section will end here and you will add a Personal Financial History.
- If yours is an established business: you will include the following actual performance statement.

#### **G. PROFIT AND LOSS STATEMENT (INCOME STATEMENT)**

Show your business financial activity over a period of time (monthly, annually). It is a moving picture showing what has happened in your business and is an excellent tool for assessing your business. Your ledger is closed and balanced and the revenues and expense totals transferred to this statement.

#### **H. BALANCE SHEET**

Shows the condition of the business as of a fixed date. It is a picture of your firm's financial condition at a particular moment and will show you whether your financial position is strong or weak. It is usually done at the close of an accounting period. Contains: (1) Assets, (2) Liabilities and (3) Net Worth.

#### **I. FINANCIAL STATEMENT ANALYSIS**

In this section you will use your income statement and balance sheets to develop a study of relationships and comparisons of (1) items in a single year's financial statement, (2) comparative financial statements for a period of time, or (3) your statement with those of other business. Measures are expressed as ratios or percentages that can be used to compare your business with industry standards.

If you are seeking a lender or investor, ratio analysis as compared to industry standards will be especially critical in determining whether or not the loan or venture funds are justified.

- Liquidity Analysis (net working capital, current ratio, quick ratio)
- Profitability Analysis (gross profit margin, operation profit margin, net profit margin).
- Debt Ratios (debt to assets, debt to equity)
- Measures of Investment (return on investment).
- Vertical financial statement analysis (show relationship of components in a single financial statement).
- Horizontal financial statement analysis (percentage analysis of the increase and decreases in the items on comparative financial statement)

## **J. BUSINESS FINANCIAL HISTORY**

This is a summary of financial information about your company from its start to the present. The Business Financial History and Loan Application are frequently one and the same. If you have completed the rest of the financial section, you should have all of the information you need to transfer to this document.

## **VII. PART IV: SUPPORTING DOCUMENTS**

This section of your plan will contain all of the records that back up the statement and decisions made the three main parts of your business plan. The most common supporting documents are:

### **A. PERSONAL RESUMES**

Include resumes for owners and management. A resume should be a one-page document. Include: work history, educational background, professional affiliations and honors, and a focus on special skills relating to the company position.

### **B. OWNERS' FINANCIAL STATEMENTS**

A statement of personal assets and liabilities. For a new business owner, this will be part of your financial section.

### **C. CREDIT REPORTS**

### **F. CONTRACTS**

### **G. OTHER LEGAL DOCUMENTS**

All legal papers pertaining to your legal structure, proprietary rights, insurance, etc. Limited partnership agreements, shipping contracts, etc.

### **H. MISCELLANEOUS DOCUMENTS**

All other documents which have been referred to, but not included in the main body of the plan. (for example, location plans, demographics, competition analysis, advertising rate sheets, cost analysis, etc).

**WHEN YOU ARE FINISHED:** Your Business Plan should look professional, but the potential lender or investor needs to know that it was done by you. A business plan will be the best indicator that can be used to judge your potential for success. It should be no more than 30 to 40 pages in length excluding supporting documents that will be of immediate interest to the person examining your plan. Keep the others with your own copy where they will be available on short notice. Have your plan neatly bound at your local print shop on in blue, black or brown covers purchased from the stationery store. Make copies for each lender or investor you wish to approach. **DO NOT GIVE OUT TOO MANY COPIES AT ONCE AND KEEP TRACK OF EACH COPY.** If you are turned down for financing, be sure to retrieve your business plan

#### **KEEP YOUR BUSINESS PLAN UP-TO-DATE**

Your plan will be beneficial only if you update it frequently to reflect what is happening within your business. Measure your projections against what actually happens in your company. Use the results to analyze the effectiveness of your operation. You can then implement changes that will give you a competitive edge and make your business more profitable.
